Overview

Traditionally, a severely resorbed maxilla with sinus pneumatization would need multiple surgeries including sinus augmentation/lifts and bone grafts to rebuild enough bone mass to create a sufficient foundation for traditional dental implant placement. In severely resorbed cases, zygomatic implants are the only possibility to rehabilitate the patient immediately. Zygomatic implants have been an evidence-based surgical and prosthetic solution since 1999. With the development of the zygomatic implant, the placement of Brånemark System® Zygoma implants has been simplified, which has eliminated the need for bone grafting altogether.

Zygomatic implants are developed for the graftless approach in which the implant is directly loaded into the zygomatic bone bilaterally, combined with two to four conventional anterior implants loaded within the alveolar bone, allowing for immediate load and function of a fixed implant-supported prosthesis.

Zygomatic implants have revolutionized traditional dental implant techniques and considerations for the severely atrophic patient minimizing surgeries, healing, and overall treatment time. This presentation will discuss critical factors from work-up and pretreatment planning to important considerations for providing an immediate fixed implant-supported restoration.

Day 1

Zygoma concept and surgical video
Presented by Dr. Shuaib Malik and Dr. Sunil Sinha

- Pretreatment surgical evaluation methods for zygomatic implants.
- Histology of zygoma and review of anatomy relative to zygomatic implants.
- Review of multiple zygoma implant surgical techniques and pros/cons of each.
- Criteria for successful treatment planning and placement.
- Surgical protocols.
- Step-by-step commentary and review of past live surgeries.
- Clinical Q & A.
- Clinical case presentation.
- Complication review.
- Literature review.
- Observe zygomatic surgical video.

Day 2

Immediate loading and prosthetics
Presented by Dr. Nader Sharifi

The prosthetic course will include a discussion on patient selection, digital technology in the treatment planning, and surgical and restorative procedure overview, as well as an in-depth presentation on the dental laboratory involvement. Specific topics Dr. Sharifi will cover on Day 2:

- Patient identification for full-arch implant construction.
- All-on-4® treatment concept for restoring a complete arch.
- Full-arch impression techniques.
- Hands-on under direct supervision.

This course is intended for clinicians with extensive experience in placing dental implants.

After this 2-day course, the participant will...

- Understand pretreatment planning, including considerations for the provisional prosthesis.
- Be able to review anatomical and biological considerations of the maxilla and zygomatic bone.
- Become familiar with and understand the three basic techniques for zygoma implant placement: inter-sinus, extra-sinus, and extra-maxillary.
- Go over recorded surgical video with live Q&A for detailed understanding.
- Discuss management of complications and maintenance of zygomatic implants.
- Be familiar with prosthetic solutions for zygomatic implants.

Speaker information
Shuaib Malik, DDS
Oral and Maxillofacial Surgeon
Dr. Shuaib Malik obtained his bachelor of science degree in biophysics and molecular biology. He then attended New York University College of Dentistry where he received his DDS. After dental school, he attended the University of Medicine and Dentistry of New Jersey, where as a chief resident he completed his oral and maxillofacial surgery residency. Dr. Malik has encompassed many types of zygoma implant approaches to gather the ability to teach all techniques and discuss the pros and cons of each. Dr. Malik is president of Maxillofacial Institute of Implantology and vice president of American College of Maxillofacial Implantology. He maintains a practice in Chicago specializing in orthognathic surgery, facial cosmetics, facial trauma, TMJ, bone grafting, pathology, dental implants, sedation, and wisdom-teeth extractions. He is currently attending at Advocate South Suburban Hospital and Midwestern University College of Dental Medicine Implantology Department.

Sunil Sinha, DDS
Oral and Maxillofacial Surgeon
Dr. Sunil Sinha graduated the New York University College of Dentistry in 2002. He then went on to complete a residency in oral and maxillofacial surgery at the University of Cincinnati Medical Center in 2007. He became chief resident of the OMFS program in which he has extensive training in facial cosmetic procedures, orthognathic surgery, complex facial trauma, and complex oral implant rehabilitation. In 2010, he became board certified by the American Board of Oral and Maxillofacial Surgery. Dr. Sinha has privileges at Advocate Christ Hospital which is the busiest Level 1 trauma center in Illinois. He currently maintains a practice in Chicago specializing in orthognathic surgery, facial cosmetics, facial trauma, TMJ, bone grafting, pathology, dental implants, sedation, and wisdom-teeth extractions. Dr. Sinha volunteers his services for the severely mentally and physically challenged as part of the Easter Seals Organization.

Nader Sharifi, DDS, MS
Prosthodontist
Dr. Nader Sharifi holds a certificate in prosthodontics and a master’s degree in biomaterials from Northwestern University. He received his dental education at the University of Illinois. He has presented more than 400 lectures covering numerous topics on restorative dentistry. His presentations on restorative dentistry and patient care have earned him recognition from esteemed study groups, societies, and associations across the nation and internationally. Dr. Sharifi is a former assistant professor at Northwestern University. In 1996 he was named to the American Dental Association’s Speakers Bureau, and in 2007 Chicago Dental Society honored him with the Gordon J. Christensen Lecturer Recognition Award. He has also been honored with fellowship in the American College of Dentists and membership in the American Academy of Restorative Dentistry—both in 2010. Dr. Sharifi currently maintains a full-time private practice of adult general dentistry in Chicago’s downtown loop.
