## Course overview

This program is meant as an introductory course about the placement of single dental implants. We will cover:

- Radiographic Evaluation
- Bone Physiology and Osseointegration
- Practical Application of Anatomy for the Dental Implants
- Medical Consideration for Implant Dentistry
- Occlusion in Implant Dentistry
- Implant Anatomy, Numbers and Possible Complications
- Wound Healing, Flap Design and Suturing Techniques
- Consent for Dental Implants
- Pre and Post-Operative Instructions
- Dental Assistant Training
- Basic Surgical Protocol and Treatment Planning

## About the speaker(s)

**Dr. Malik** obtained his Bachelors of Science with an emphasis in Bio-Physics and Molecular Biology in 1999. Dr. Malik then attended New York University College of Dentistry where he received his degree in 2003. After dental school Dr. Malik attended the University of Medicine and Dentistry in New Jersey where he completed his residency in Oral and Maxillofacial surgery.

With his extensive training and clinical experience, Dr. Malik has become a leading provider in the placement of zygomatic implants, onlay and symphyseal/ramus and iliac crest hip bone grafts for patients who have upper (maxillary) and lower (mandibular) deficiencies. Dr. Malik has been privileged to lecture on implant and reconstructive surgeries around the world.

Dr. Malik is the President of Maxillofacial Institute of Implantology and Vice President of The American College of Maxillofacial Implantology.

**Dr. Sinha** became Board Certified by the American Board of Oral and Maxillofacial Surgery. His training at the University of Cincinnati brought to light his passion for orthognathic and trauma surgery. Dr. Sinha has privileges at Advocate Christ Hospital which is the busiest Level 1 trauma center in Illinois as well as various other local hospitals.
