A team approach to the prevention, diagnosis, and treatment of peri-implant diseases and complications

With interactive workshop

May 8, 2015
Friday
Nobel Biocare Training Institute
Yorba Linda, CA

presented by
Donald S. Clem, DDS

Dr. Don Clem

Overview
Since implants were introduced to dentistry nearly 30 years ago, we have at times been under the impression that they are somehow “resistant” to inflammatory disease. We now know this is not the case – implants require careful monitoring and maintenance and that soft-tissue as well as bone changes can occur in response to inflammation. This presentation will explore the prevalence of peri-implant diseases, their diagnosis, and prevention.

What does the dentist and hygienist need to know regarding the management of implants, and how do we incorporate clinical and radiographic findings into our maintenance protocols? In addition to answering these questions, we will explore risk factors, treatment options, and how regeneration can help minimize the consequences of bone loss. We will explore the failed implant and how the dental team can come together to resolve the most devastating of consequences for the patient and staff.

This course is recommended for dentists and hygienists.

After this one-day course, the participant will...
- Understand peri-implant disease and how it is managed.
- Confidently apply techniques for preventing failures and understand detection.
- Techniques for evaluating excess cement extrusion.
- Develop an implant maintenance protocol for dental hygienists.
- Understand basic concepts of bone regeneration.

For venue location, speaker information, and registration form, please see the reverse side of this invitation.

Cancellation policy: No refund for no-shows or cancellations made within 14 days of the start date of the program. All cancellations must be in writing and faxed to 714.282.4812. Should Nobel Biocare cancel a course, liability is limited to refund of the full amount of the course fee.

Speaker information
Donald S. Clem, DDS
Dr. Donald S. Clem received his certificate in periodontics from the University of Texas at San Antonio in 1984. He is a diplomate of the American Board of Periodontology. He is the recipient of numerous awards in his field, including recognition by the California Society of Periodontists for “Outstanding Contribution to the Field of Periodontics,” and was co-recipient of the Clinical Research Award by the American Academy of Periodontology for his publication on implant function in regenerated bone. He is also a fellow of the American College of Dentists, the International College of Dentists, and the Pierre Fuchard Academy. His publications include articles on conscious sedation, periodontal regeneration, and dental implants. He has lectured both nationally and internationally on these topics.

Dr. Clem has been in full-time practice in the fields of periodontics and dental implants in Fullerton, California, since 1984. In 2011, he served as president for the American Academy of Periodontology.

ADA CERP
Nobel Biocare USA, LLC, is an ADA CERP recognized provider.
ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry. Nobel Biocare USA, LLC, designates this activity for 6 continuing education credits. Nobel Biocare USA, LLC, is an ADA CERP recognized provider.

Approved PACE Program Provider, FAGD/MAGD Credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement (08/01/2013 to 07/31/2016). Provider ID# 209731.
